## U.S. Patent Application No. 10/609,417

- 21. (previously presented) The method of claim 20, wherein said PapMV is a wild-type virus.
- 22. (previously presented) The method of claim 20, wherein said PapMV is a recombinant virus.
- 23. (previously presented) The method of claim 20, wherein said PapMV is a pseudovirus.
- 24. (previously presented) The method of claim 20, wherein said antigen is an immunogen.
- 25. (currently amended) The method of claim 20, wherein said antigen is fused to a <u>coat</u> protein of said PapMV or VLP.
- 26. (cancelled) The method of claim 25, wherein said protein is a coat protein.
- 27. (previously presented) The method of claim 20, wherein said antigen is covalently attached to said PapMV or VLP.
- 28. (previously presented) The method of claim 20, wherein said antigen and said PapMV or VLP are not linked.
- 29. (previously presented) The method of claim 20, wherein said antigen and said adjuvant are administered parenterally, enterally or orally to said animal.
- 30. (previously presented) The method of claim 20, wherein said immune response is systemic.

## U.S. Patent Application No. 10/609,417

- 31. (withdrawn) The method of claim 20, wherein said immune response is a mucosal immune response.
- 32. (previously presented) The method of claim 20, wherein said immune response is a humoral immune response.
- 33. (previously presented) The method of claim 20, wherein said immune response is a cellular immune response.
- 34. (previously presented) The method of claim 20, wherein said antigen is a viral, a bacterial or a parasitical protein, or fraction thereof.
- 35. (previously presented) The method of claim 20, wherein said antigen and said adjuvant are co-administered to said animal.
- 36. (previously presented) The method of claim 20, wherein said adjuvant is administered to said animal prior to administration of said antigen.
- 37. (previously presented) The method of claim 20, wherein said adjuvant is administered to said animal subsequent to administration of said antigen.
- 38. (previously presented) The method of claim 20, wherein said animal is a mammal, bird or fish.
- 39. (previously presented) The method of claim 38, wherein said animal is a mammal.
- 40. (withdrawn) The method of claim 38, wherein said animal is a bird.
- 41. (withdrawn) The method of claim 38, wherein said animal is a fish.

## U.S. Patent Application No. 10/609,417

- 42. (previously presented) The method of claim 20, wherein said animal is a human.
- 43. (new) The method of claim 20, wherein said PapMV coat protein is a modified PapMV coat protein, said modified PapMV coat protein being capable of multimerization to form said VLP.
